Deciduous Trees

Trees are used for a great variety of conditions. They give seclusion and break the sky line; they are necessary for shading the lawn, the highway, also for creating screens, backgrounds, and boundaries. There are plants in this group for any situation or location which you may have.

A good root system, straight stems, and a well-branched head—these are the qualifications of a well-grown tree.

Deciduous Flowering Shrubs

Shrubs are an important item in the landscaping of your grounds, producing either blossoms of various colors at different periods during the Summer and Fall, or berries which are showy in color and useful in attracting the birds. The different varieties each have their own character of growth which, when combined, make a very pleasing effect. Planted to blot out some unsightly object or for foundation plantings around the dwelling, they are indeed useful.

Our shrubs are necessarily listed according to size, and it is impossible for us to state in every description just how heavy and well-branched each shrub is.

A good shrub is dense in growth, heavily branched, with an excellent root system—a specimen in every respect, and is bound to grow.

10 or more shrubs of 1 variety will be sold at a discount of 20 per cent.

Ornamental Vines

Vines and Climbers mature quickly, and, in most cases, have a wealth of luxuriant foliage and bright, fragrant flowers. They are desirable for quick results in covering the bare sides and softening the sharp angles of buildings, hiding unsightly fences, beautifying and shading porches, bowers, and summerhouses.

Hedge Plants

California Privet

For formal effects, Privet is the best. It can be clipped to any shape, grows rapidly and is very hardy.

1½ to 2 ft. high (requiring 150 plants to 100 ft. of hedge).....\$6.00 per 100 plants.
2½ to 3 ft. high (requiring 125 plants to 100 ft. of hedge).....10.00 per 100 plants.

Sizes designate height of Privet when dug in nursery. It would be cut back to 12 inches when planting the hedge.

Our charge for planting Privet is \$9.50 per 100 feet when soil and digging conditions are normal. This price includes digging the trench, placing the plants, filling in and the initial trimming of the hedge.

Barberry

Barberry

Barberry is also a most excellent hedge plant, especially when informal or natural effects are to be obtained. One of the most attractive features of Barberry is that it carries quantities of red berries during the Winter, adding a most attractive feature to the landscape.

12-18 in. high (requiring 100 plants to 100 ft.)

\$20.00 per 100 plants

18-24 in. high (requiring 75 plants to 100 ft.)

\$35.00 per 100 plants

Our charge for planting Barberry is \$12.00 per 100 ft.

Barberry is also an excellent shrub for planting around the foundations of the house. For this purpose we carry in stock plants 2½ to 3 feet high, 75c. each.

Dianthus barbatus (Sweet William)

Hypericum moserianum (Goldflower)

Papaver (Poppy)

Hardy Perennials—Old-fashioned Flowers

The old-fashioned garden, planted wisely, keeps the table and house constantly supplied with cut flowers. Perennial flowers may be planted almost anywhere and there are varieties for every location—rockeries, moist places, under partial shade, foregrounds for shrubby borders, and for low or partial screening. No other class of plants offers the variety as to color and shape of blooms as the perennials do, and they are a constant satisfaction to the garden lover.

The success of any plant of this type depends entirely upon its roots and only plants which develop the best root system are retained for sale.

(Plants suitable for rockeries are marked *)

Prices of perennials except where otherwise noted, is 25c. each, or \$20.00 per 100

Roses

The right assortment of Roses, planted in a loamy soil thoroughly spaded over to a depth of 1½ to 2 feet, and well fertilized with rotted cow manure, will bring surprising results. Roses rightfully stand first among the hardy flowers and should be a part of every home garden.

Home Garden Fruits

There is room for a few fruit trees on every suburban or country place.

They combine both utility and beauty and there is no greater satisfaction than in following the growth of a small tree from when it first begins to grow till the ripened fruit is ready to be picked.

The size of all standard trees, except Peaches, is 1 to 1½ inch diameter and 4 to 6 feet high. Price is \$2.00 each, \$20.00 per doz., \$150.00 per 100.

Peach trees, ⅝ to ¾ inch diameter, 4 to 6 feet high, \$1.00 each, \$10.00 per doz., \$75.00 per 100.
